A COST-EFFECTIVE WAY TO SERVE CUSTOMERS

- **Sell more:** People buy what they see. If Topbox Bar is where the customers are, you'll sell more (and faster).
- **Save time:** With Topbox you don't need to empty the bar when closing. Open the roof and start selling in a minute.
- **Flexibility:** Topbox can be closed and opened without effort several times a day if needed.
- **Sustainability:** Topbox has a very long lifespan with quality parts and recycling.
- **Show your brand:** Topbox will make sure that your brand and quality are visible both during and after opening hours.

MAKE YOUR TERRACE MORE PRODUCTIVE

The service can be offered to larger numbers of customers, with only one person.

A Topbox Bar can be closed at the push of a button if the weather conditions are not attractive and opened in a blink of an eye when the situation changes.

No solid walls, no sight barriers, less challenges with building permits.

QUALITY AND SAFETY

The functionality of the units has been tested in Nordic extreme conditions, so that the workplace is always safe. Topboxes fill EU directives (e.g. machine directives), and they are CE marked.

Occupational safety and ergonomics, as well as official regulations are always the starting points of our product development.

A NEW WAY TO WORK IN SHOPPING MALLS AND AIRPORTS

For example, you can easily invest hundreds of thousands of euros to start a cafe business in a shopping mall and the location may still be the wrong choice.

With Topbox, **you can change your business location** when needed and continue at the next location without any additional investment.

The unit is burglar-protected and can be freely placed in the desired location thanks to its **own water and sewage system**.

Thanks to a safe and **protected electrical system**, you can start your business by turning on the power.

THE APPEARANCE COMMUNICATES 24/7

The brand's image is constantly being disseminated.

Thanks to carefully selected surface materials and its robust construction, the Topbox unit is always representative, whether the sales stand is open or closed, indoors or outdoors.

HYGIENIC AND FOOD SAFE

Topbox meets the **hygiene and safety requirements** of the authorities.

Closing the roof makes Topbox **protected against dirt and pathogens.**

Top-quality machines and equipment make the operation and food safe.

Testimonial - NH Collection Helsinki Grand Hansa

"NH Collection Grand Hansa is a 5-star premium hotel in the heart of Helsinki in Finland.

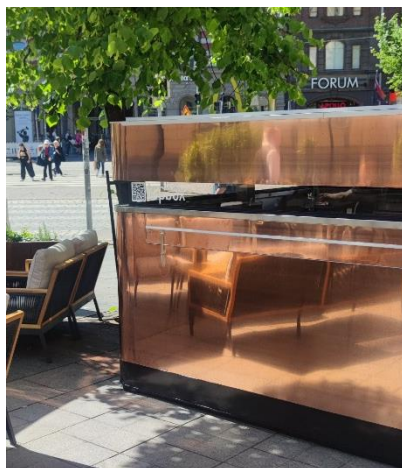

We want to continue the 5-star experience also outside our hotel at the terrace. We chose to have a Topbox, as it seems to be the best solution for a weather-dependent business. Sometimes we need to open or close the bar several times a day, if the weather changes and customers are either coming in masses, or not at all.

We save a lot of time, when we don't have to empty the bar when we close it or bring back all the equipment when we open the bar. It just takes one person to open the bar in 90 seconds. That's how we provide accurate service to our customers efficiently.

We also chose the Topbox to be made of copper, so that it blends in with the design and style of our hotel".

Tom Sandström

Hotel General Manager

Testimonial – Allresto Munich Airport

“We have very strict regulations at Allresto at Munich Airport, and we are very happy to have found Topbox, who can provide us just the quality and tailor-made sales units that are individually adapted to our requirements.

Since the beginning of planning phase, we have had good and constant contacts with Topbox. The assembly and installation have been as easy and professional too.

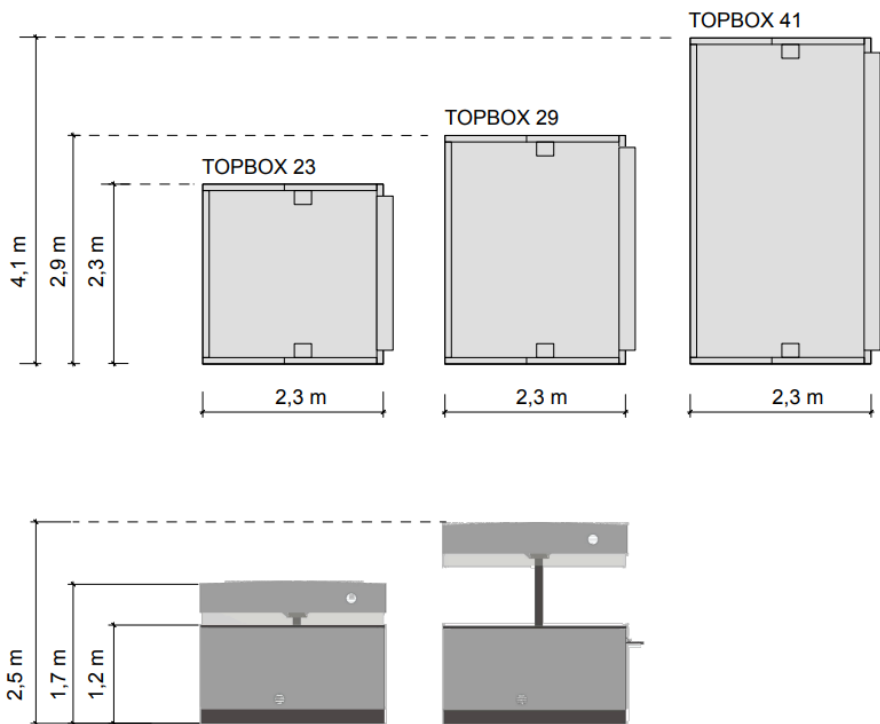

Our staff is really pleased with the ease-of-use of Topbox, as it can be closed and opened without effort several times a day if needed. Even one to two persons can handle the Topbox easily. A great bonus is the built-in water tank solution and sinks.

Overall, we are very satisfied with both of our Topboxes!”

Christoph Zieschank,
Abteilungsleiter / Planung und Bau
