# A COST-EFFECTIVE WAY TO SERVE CUSTOMERS

With Topbox sales units, you get additional sales on the terrace and at events.

To expand the existing business, or as your own independent point of sale.

Open in 90 seconds, and close in 90 seconds. React to weather and customer flows.

# MAKE YOUR TERRACE MORE PRODUCTIVE

With Topbox, the queue at the cash register is lightened. In addition, the service can be offered to larger numbers of customers, with the power of one person.

Can be closed at the push of a button if the weather conditions are not attractive and opened in a blink of an eye when the situation changes.

No solid walls, no sight barriers, less challenges with building permits.

# AS AN ATTRACT FOR EVENTS OR ON THE TERRACE

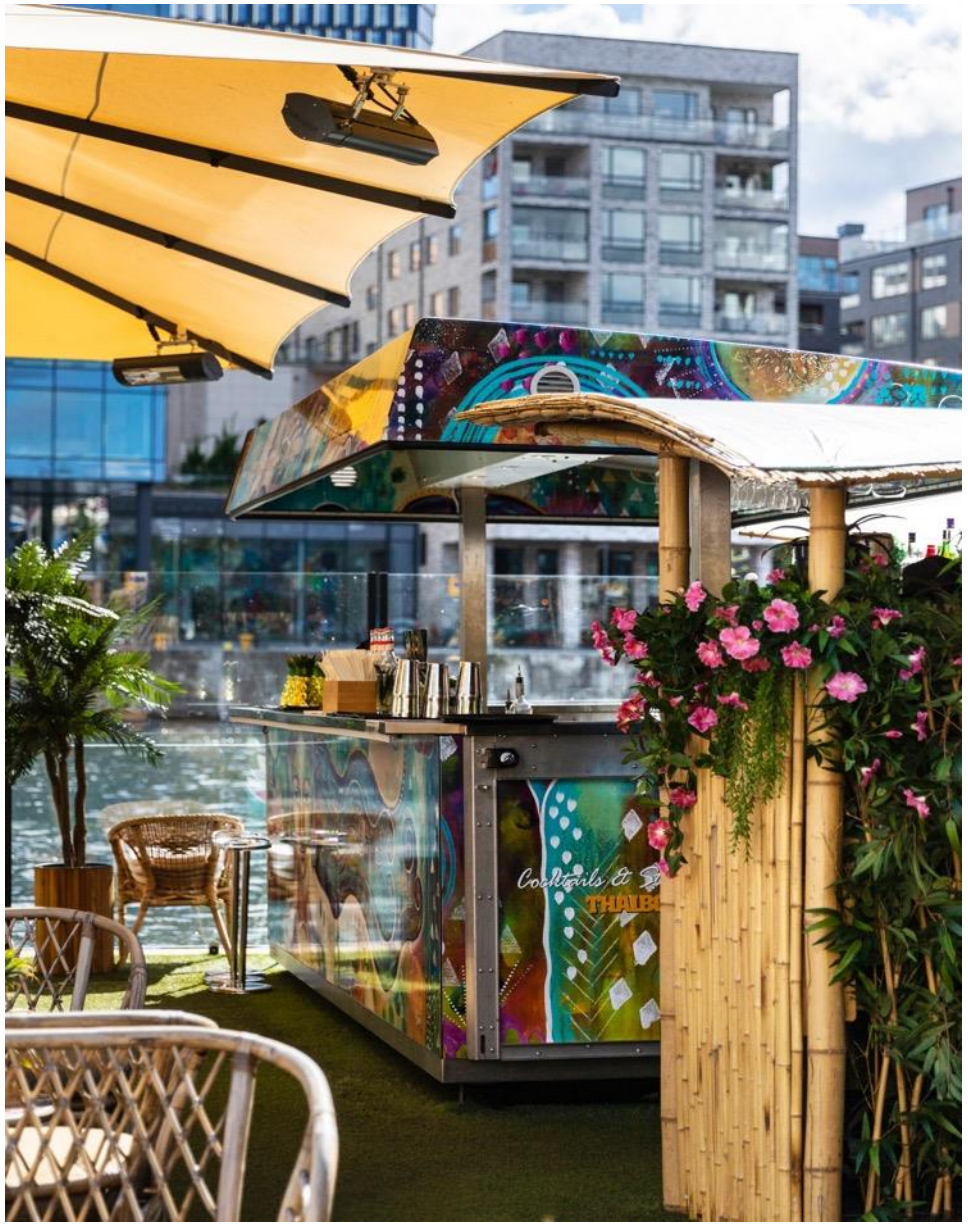
Many of our customers cooperate with brand companies that brand the points of sale for the products they represent and offer these to their customers. The customer buys what he sees.

Thanks to carefully selected surface materials and its solid structure, the Topbox point of sale is always presentable, whether it is open or closed, inside or outside.

Visibility combined with a high-quality product and service enables more sales.

# CAREFREE CONCEPT

- Buy for your own or rent.
  - Includes a unit designed according to your wishes and ready for operation with accessories from a wide selection.
- 12-month warranty, commissioning training and support.
- With a maintenance contract, we can take care of storage and logistics outside of the possible season, with an extended warranty.

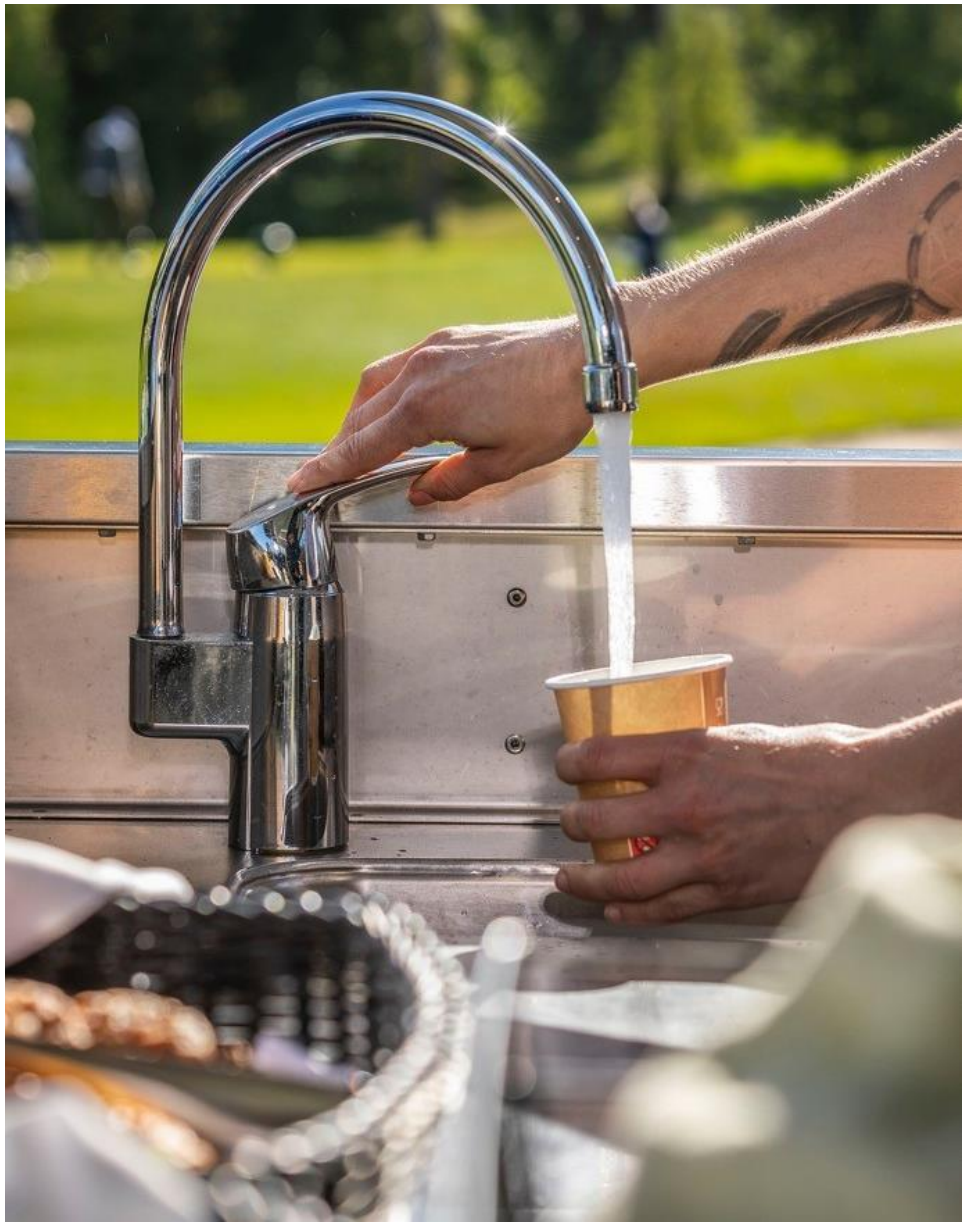


# TOPBOX– READY TO USE SALES UNIT

Topbox is a Finnish top-quality point of sale with CE approval and TÜV approval pending.

The unit is burglar-protected and can be freely placed in the desired location thanks to its own water and sewage system.

Thanks to a safe and protected electrical system, you can start business by turning on the power.



# HYGIENIC AND FOOD SAFE

The Topbox point of sale meets all the hygiene and safety requirements of the authorities.

Topbox's closed roof is an excellent protection against dirt and pathogens.

Top-quality machines and equipment make the operation food safe.

# QUALITY AND SAFETY

The functionality of the units has been tested in Finland's extreme conditions, so that the workplace is always safe. Top boxes fill EU directives (e.g. machine directives), and they are CE marked.

Occupational safety and ergonomics, as well as official regulations are always the starting points of our product development.

Thanks to a safe and protected electrical system, you can start business by turning on the power.
